Tsimis SA has a long tradition in the field of flexible packaging.

The increased demands of our customers, our sensitivity for the proper functioning of the company, combined with the challenge of a united Europe, requires the continued improvement of our Quality at all levels.

Achieving this goal requires implementation in Quality and Food Safety Management Systems at all levels and in all activities of the Company. This requires the harmonization of company functions with international quality standards EN ISO 9001:2015, EN ISO 22000:2018 and FSSC 22000 PACK.

Tsimis SA is willing to provide the necessary human and financial resources for the proper functioning of these management systems.

The modern and sophisticated equipment of our factory has the strict requirement to "ensure" as far as possible both the highest quality and the production of safe products for Public Health.

Full compliance with laws and regulations relating to occupational safety is non-negotiable, so as to eliminate the likelihood of accidents and ensure the appropriate working conditions for staff in order to deal smoothly with the improvement of productivity, but also the quality of the products and services.

TSIMIS SA has set up its Operating Framework and has analyzed and taken special care of all possible risks that may have an impact on Company, Production Process and Product Safety.

It is imperative for the future success of our Company, with the implementation of Quality and Food Safety Management Systems to ensure the minimization of accidental risks and the control of systematic risks for the Health and Safety of consumers during the production processing, storage and distribution of food packaging that produces and markets the Company.

The participation of everyone in this effort is vital to ensure continued growth and success of Tsimis SA. The Company's management is responsible for the implementation of the recorded proceedings, so as to allow the application of our policy and confirm that the targets set are realistic and measurable.

The Quality Assurance Manager should provide all possible assistance in all phases of design and implementation, to confirm the application procedures and to accept suggestions to improve our products and services.

DENISE TSIMIS
PRESIDENT OF THE BOARD
JULY 2018
